

About Virtual SMS

Virtual SMS has developed not only a sms product that can personalize every single sms that is sent automatically but also created a two way messaging platform where the recipient can reply to the sms received from the bulk sms sent, also known as two way messaging.

7 Reasons to use SMS

1. SMS marketing and messaging is affordable.
2. Hi ROI - Because of a sms being so affordable, the return of investment is almost instant.
3. Text messages arrive instantly, literally in seconds.
4. High open rates, sms's are opened 95% of the time against the 25% of e-mails received.
5. It is to the point, with only 160 characters per sms forces any business to be to the point.
6. Everyone owns a mobile phone and we love to text.
7. SMS is GREEN, nothing to throw in the garbage i.e mail etc

What is required?

Virtual SMS only requires internet with web access. No special software required.

Virtual SMS Will:

- + Save up to 30% of your telecommunication costs.
- + Provide you and your customer a two way communication channel.
- + Save money on unnecessary telephone calls.

Virtual Short Codes

Virtual also provides short code campaigns to companies whereby campaigns can be managed by companies themselves.

Virtual can be contacted for pricing and further details on these types of services.

Why Virtual SMS?

- + Regular site upgrades - each user can send 1000 sms's per second.
- + No contracts or hidden costs.
- + SMS credits only expire after 12 months of non-use.
- + Minimum purchase of 500 sms credits at a time.
- + Direct links to all major service providers.
