VIRTUAL
THE DIFFERENCE...

Virtual Antivirus

Computer virus infection is inevitable when you dont take proactive measures to secure your computer and network.

What is "Managed Antivirus"?

Virtual takes care of installing antivirus software o all computers and other devices, and will then optimise all the settings based on your needs.

We will ensure that all software stays up-to-date and that scans are scheduled for a convenient time, so as not to disrupt you.

This is the ultimate solution for looking after your computers and protecting your devices and business from viruses.

The Ransomware Threat

Ransomware poses a serious threat to your business. opening a seemingly innocent email attachment may lead to malicious software blocking access to all your files. Hackers normally demand a sum of money to be paid for removal.

We offer the solution.

Our advanced antivirus will detect ransomware among other threats. However, caution should still be exercised when opening any suspicious files.

In the event of a recovery, the labour and call out is FREE

The Benefits of Managed Antivirus

- **Consistent level of security**
  All your devices will have the same antivirus installed and will be updated to ensure that systems are protected form any new security threat.

- **Easy management**
  Your antivirus will be managed by tech experts, thus bypassing any personal hassle or an overworked IT department.

- **Low-cost solution**
  This solution is offered as a monthly package paid per user.

- **Continual management**
  Managed antivirus solutions cannot be uninstalled or disabled, thus ensuring reliable security.

- **True protection**
  Our experts are trained to take care of virus infections quickly and efficiently, reducing the risk of vulnerable systems.
