

Hosted Exchange

Email anytime, anywhere

What is Hosted Exchange?

Email has become one of the **most frequently used business tools**, with many customers relying on it more than their telephone to help them get through their work day.

It has become clear that **businesses need to capitalize** on the use of email that is becoming the key driver behind running effective and profitable operations.

Hosted Exchange is an affordable, premium email service based on Microsoft® Exchange Server technology, allowing small and medium businesses the ability to take advantage of full collaboration Mail services such as Shared Calendaring, Public Folders, Global address books and more.

Why outsource your hosted exchange to the Virtual Group?

Unfortunately, for most SMBs [Small Medium Businesses], the cost of running a Microsoft Exchange server 'in-house' is simply too much.

Upfront costs can **exceed R100 000**, plus staff time to maintain the server. This is why 'managed Exchange hosting' or 'Exchange outsourcing' makes sense for smaller businesses. Exchange email outsourcing allows businesses to enjoy the same enterprise-strength IT that Fortune 500 companies have, but at a price they **can afford**.

Product costs

LITE - 10GB POP Mail	LITE - 10GB POP Mail+ archive	Standard Exchange 10GB	Professional 10GB + archive
