

REMOTE WORKFORCE MONITORING TOOL

WOULD YOU LIKE TO KNOW WHAT YOUR TEAM SPENDS THEIR TIME ON?

With **technology** now not being an option, but **essential** in every business, some challenges arise when it comes to staff and their working habits. As a business owner the biggest challenge is to make sure that your staff is **productive** and company information is safe.

VirtualTrak the new...

VirtualTrak will provide immediate visibility into **HOW** and **WHAT** people do at work so that you can boost productivity and harden security.

VirtualTrak collects and normalises user activity data providing visibility, analytics and context. Get the real story behind **HOW** your employees work and **WHAT** hinders their productivity so you can streamline and optimise business tools, processes and teams.

What does VirtualTrak do?

- Uncover poor operational processes and workflow bottlenecks
- Analyse productivity activities and behaviour patterns
- Get visibility into cloud application proliferation and usage trends
- Gain insights into remote employee work patterns and time management
- Identify insider threats to reduce security vulnerabilities
- Get alerted to employee activities that introduce compliance risk
- Easily generate detailed reports for audit trail requirements
