GENERATOR MONITORING

Powered by:

VIRTUAL IOT SOLUTIONS

MANAGING GENERATORS CAN BE A DAUNTING TASK. FUEL LEVELS DROP, BATTERIES DRAIN, AND MAINTENANCE SCHEDULES SLIP THROUGH THE CRACKS. BUT WHAT IF YOU COULD HAVE EYES ON EVERY GENERATOR, 24/7, WITHOUT LIFTING A FINGER?

Virtual Power Solutions introduces a revolutionary new service: remote generator monitoring and management. Say goodbye to guesswork and unexpected outages. We take the guesswork out of generator care, so you can focus on what matters most - your business. More than just backup, your generators are a vital investment. Keeping them running smoothly requires proactive care, not last-minute scramble.

OUR COMPREHENSIVE MONITORING SYSTEM COVERS ALL THE BASES:

➤ SERVICE MANAGEMENT

We track usage hours and alert you for both minor and major services, ensuring peak performance and preventing costly breakdowns.

➤ FUEL MANAGEMENT

No more empty tanks! We monitor fuel levels and remind you to refill before you're caught short.

➤ START/STOP MANAGEMENT

Need to remotely activate or deactivate your generator? One call is all it takes. We'll handle it, even if it's outside your usual schedule.

➤ BATTERY VOLTAGE MANAGEMENT

Batteries lose their juice over time, especially in unused generators. We keep an eye on their health and alert you when they need a boost.
