

## CVE SCAN ALTOSTRAT ROUTERS

VIRTUAL TECHNOLOGY

### WHY CHOOSE VULNERABILITY SCAN?

Virtual Group is proud to introduce our latest solution, the Vulnerability Scan for AltoStrat Routers, designed to keep your network safe from cyber threats. Our Vulnerability Scan solution is a powerful tool that thoroughly checks all connected devices for known security weaknesses or vulnerabilities. It uses the CVSS (Common Vulnerability Scoring System) to rate the severity of each vulnerability, giving you a clear picture of your network's security status.

#### ➤ ARE YOU COMPLIANT?

The South African market is now moving towards compliance and in certain industries and the CVE report forms part of these compliance requirements.

### HOW DOES IT WORK?

#### ➤ SCANS YOUR NETWORK:

The solution examines every device connected to your network, looking for security flaws that could be exploited by hackers.

#### ➤ IDENTIFIES VULNERABILITIES:

Each vulnerability found is assigned a CVE (Common Vulnerabilities and Exposures) code. This universal code makes it easy to find detailed information and solutions for each issue.

#### ➤ PROVIDES EASY-TO-UNDERSTAND SCORES:

The CVSS score helps you quickly understand the severity of each vulnerability, so you know which ones to address first.

### WHY IS THIS IMPORTANT?

#### ➤ PROTECT YOUR DATA:

Ensure that your sensitive information remains secure.

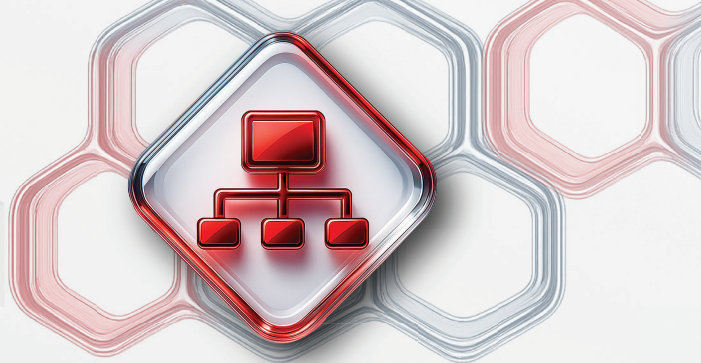

#### ➤ PREVENT UNAUTHORIZED ACCESS:

Stop cybercriminals from exploiting vulnerabilities to gain access to your network.

#### ➤ MAINTAIN NETWORK PERFORMANCE:

Keep your network running smoothly by addressing potential security threats before they cause problems.

## CVE SCAN ALTOSTRAT ROUTERS

VIRTUAL TECHNOLOGY

### THE RISK OF HIGH VULNERABILITIES

- **DATA BREACHES:**  
Hackers can steal sensitive information, leading to financial loss and reputational damage.
- **MALWARE INFECTIONS:**  
Vulnerabilities can be exploited to install malicious software, disrupting your operations.
- **SERVICE DOWNTIME:**  
Cyber attacks can cause significant downtime, affecting your business continuity and productivity.

### THE BENEFITS OF OUR SCAN

- **COMPREHENSIVE SECURITY:**  
Thoroughly scans your entire network and all connected devices.
- **USER-FRIENDLY:**  
Easy to use, even if you're not a tech expert.
- **PROACTIVE PROTECTION:**  
Identifies and helps you fix vulnerabilities before they can be exploited.

### VIRTUAL GROUP'S ALTOSTRAT

#### VULNERABILITY SCAN COST - RETAIL

Cost per scan  
(per router)

**R 108,75**

*\*Please note the router needs to be AltoStrat enabled*
